

## VILLAGE OF LOCH LLOYD 2018 EMERGENCY MGMT. UPDATE

Residents of The Village of Loch Lloyd who wish to be notified by text or email of impending severe weather should sign up for those notifications through Everbridge Systems, the Cass County contracted system.

If you wish to avail your household of the service, log in to [casscountyesb.com](http://casscountyesb.com), click on "EMERGENCY NOTIFICATION SYSTEM", and you will be prompted to fill out an account form with pertinent address and phone numbers. Everbridge will then notify you of severe weather in our area.

**IF YOU DO NOT SIGN UP FOR THIS, YOU WILL NOT BE NOTIFIED OF SEVERE WEATHER INCLUDING TORNADO WARNINGS.**

The Village of Loch Lloyd's internal system notifying residents of our own Emergency Management communications will still be serviced by CodeRED. We are entering our fourth year of a contract and feel CodeRED has more than adequately served our needs.

We use this system to directly communicate with our Emergency Management Commanders and Block Captains. It will also be used to communicate with individual residents after a declared disaster giving you directions and updates to deal with an emergency situation. Please have CodeRED incoming numbers 866-419-5000 and 855-969-4636 in your Contact List so the calls will not be rejected.

We urge you to sign up with Everbridge for severe weather notifications and to maintain a Weather Alert radio for home use.

Loch Lloyd Emergency Management
